

Dr Ibrahim Abu Tahun

DDS, PhD Endodontics

Department of Conservative Dentistry, University of Jordan

Dr. Ibrahim H. Abu Tahun is Associate Professor of Endodontics, Department of Conservative Dentistry, Faculty of Dentistry, University of Jordan. He is a 1982 graduate of University of Athens, Greece and received his PhD in endodontics at the Department of Endodontics at the same university in 1987.

Dr. Tahun served in many capacities, such as founding president, Jordanian Endodontic Society, founding president, Pan Arab Endodontic Society and President of Asia Pacific Endodontic Confederation.

As an active member of several organizations, Dr. Abu Tahun has received the "International Globe Award" in Endodontics.

He also served as Chairman of Higher Education Committee, Jordan Medical Council, Chairman of the Scientific Committee and Chairman of Planning and Training committee, Jordanian Board in Endodontics.

He has lectured extensively within Jordan and worldwide as invited and guest speaker and has presented a large number of hands-on courses in the field of root canal treatment.

Abstract Paper:

Title: Can we do it forever?

Dentistry and endodontics is changing at an ever increasing speed. Conventional methods of work are rapidly being replaced by new work flows.

Seeking “short road to freedom” with major benefits compared to the current process referred to as "conventional root canal treatment", research studies signal the need for a major shift in the way pulpal problems are currently managed by dentists.

Based on clinical and scientific results presented in the professional literature, this fresh look at the evidence through an insight into dilemmas and controversies aims to think out of the box and figure out a more well-rounded approach to addressing endodontic disease.

With all those great things happening in endodontics, this presentation is attended to share personal thoughts and cultivate future potentials in this field as a strategic priority without undermining the efficacy of traditional endodontic therapies but to position practitioners at the forefront of this field.
